24 Sept 2013

Fort Belvoir, VA – **The Research & Engineering (R&E) Gateway is now live.** This new entry point for the Defense Technical Information Center (DTIC) offers a secure space for DTIC registered users to work, virtually, on current efforts or build upon past research using information that is both dynamic and community-driven.

How does the R&E Gateway help you?

- Reuse information and avoid duplication of efforts = saving time, money and resources
- A business networking tool for secure collaboration to discuss, examine, and solve technology issues
- Virtual discussions with the entire S&T community or small working groups – regardless of time, geography, and organization
- Authoritative information captured in DTIC collection - trusted source
- Current and past research at your fingertips using a simplified search with new options to refine search queries
- Planning tool to help you coordinate, consolidate and track project data
- Get up to speed quickly - no email threads to work through; get the history of discussions on one page

**Designed by DoD specifically for the defense S&T enterprise, the R&E Gateway is accessible to DTIC registered users, with a Common Access Card (CAC) or password/user ID. Not registered with DTIC? Go to <http://www.dtic.mil/dtic/registration/>**

Please note - DTIC Online Access Controlled (DOAC) will only be available for approximately 60 days following the 24 Sept. launch of the R&E Gateway. During that time, DOAC will be accessible from a link on the R&E Gateway homepage.

*DTIC's mission is "to provide essential technical RDT&E information rapidly, accurately and reliably to support our DoD customers' needs." A DoD Field Activity, DTIC is under the leadership of the Under Secretary of Defense for Acquisition, Technology and Logistics and reports to the Assistant Secretary of Defense for Research and Engineering.*

**A Connected DoD = Challenges Solved**
